Sharlene,

I have attached everything I've done with the bromopropanes and I do not have anything else. I hope this is what you need.

Calvin W.

Hi Calvin, I believe the September meeting will focus on 1-bromopropane so let's go over that situation again.

Best regards,
Sharlene

Sharlene,

My mistaken memory, the TCE and cardiovascular malformations review was not TERA, but the reference (via Google) is:

OPPT Trichloroethylene (TCE) Draft Risk Assessment. Final Comments of 9 Member Peer Review Panel. September 5, 2013

My summary is shown on pages 56-73.

A second public statement on TCE was published as:

Willhite, C.C. 2001. Trichloroethylene carcinogenic potency. Human and Ecological Risk Assessment 7(4): 767-777.

If you can wait until I return home I can send you full copies of these publications.

Calvin Willhite

Calvin,

Thank you for your prompt response and interest in the September and October TSCA SACC meetings.

I shall look at your responses to the four questions. I have a couple of clarifying questions.

1. 1-bromopropane. When was the NTP CERHR Panel? Please provide a reference to the risk analysis you mentioned.
2. TCE. When was the TERA analysis panel? Who requested that the TERA panel do an analysis, e.g., specific company or companies? Was this a public meeting? Do you have a copy of your public statement that you could send along?

Best regards,
Sharlene

Hello Sharleen,

We have not met in person, but perhaps will do so this next week at the Holiday Inn.

I am available the dates you list and can best contribute to:

1-bromopropane (where I served on the NTP CERHR Panel and published its risk analysis - this could be taken as a public statement on this material).

TCE (I served on the TERA analysis panel that considered the developmental toxicology and did make public statements on the web cast)

carbon tetrachloride (no previous panel work, but I have published 2 studies in rodents wherein CCl4 was a experimental test group)

I did manage research risk assessment contracts on PCE when I was an employee with State of California during promulgation of the MCL for drinking water.

I have no financial or other interests in these 3 substances.

Hope this helps. Being a DFO is no easy task.

Calvin Willhite

Subject: FW: TIME-SENSITIVE - IMPORTANT TSCA SACC AD HOC Member Request for responses to 4 Questions regarding "Impartiality": 5 chemical risk evaluations that will be reviewed by the TSCA SACC

Greetings!

I've addressed this message to prospective or current TSCA SACC ad hoc members, "bcc," to avoid inadvertent replies to all.

Thank you again for your participation on the TSCA SACC.

The TSCA SACC has a very busy schedule in 2019 with meetings scheduled from June through December 2019. On December 19, 2016, EPA published a list of 10 chemical substances that are the subject of the Agency's initial chemical risk evaluations, as required by TSCA § 6(b)(2)(A). The docket numbers, problem formulations, scope documents and supplemental documents for the 10 chemical substances that EPA initiated the risk evaluation process for in December 2016 can be found here:

- [Pigment Violet 29](#) (TSCA SACC meeting, June 2019)
- [1, 4 Dioxane](#) (TSCA SACC meeting, July 29-Aug 2, 2019)
- [Cyclic Aliphatic Bromide Cluster \(HBCD\)](#) (TSCA SACC meeting, July 29-Aug 2, 2019)
- [1-Bromopropane](#) TBD
- [Methylene Chloride](#) TBD
- [N-Methylpyrrolidone](#) TBD
- [Perchloroethylene](#) TBD
- [Trichloroethylene](#) TBD
- [Carbon Tetrachloride](#) - TBD
- [Asbestos](#) - TBD

Future meetings will focus on the Agency's draft risk evaluation for the remaining seven (7) chemicals: 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, trichloroethylene, carbon tetrachloride, and asbestos.

For planning purposes, please indicate your interest in participating as an ad hoc member of the TSCA SACC for review of the Agency's draft risk evaluations for 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, trichloroethylene, carbon tetrachloride, and asbestos.

In addition, please indicate your availability for the following dates September 9-13, 2019 and October 21-25, 2019.

If you are interested and potentially available, please respond to the four questions regarding "impartiality" with respect to 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, and trichloroethylene (see Table below and word file attached). A public announcement of the specific draft chemical risk evaluations for the September meeting will be published within the next 2 weeks; however, we need to make sure that there is a quorum of TSCA SACC members and adequate representation of expertise (additional ad hoc members) to address the Agency's charge before the official announcement is published. I know many of you will be traveling to the upcoming TSCA SACC meeting on 1,4-dioxane and HBCD, July 29-August 2, 2019. Time is of the essence. Please contact me if you have questions or concerns.

Thank you.

Sharlene (mobile: 240-286-4365 (Fridays); office: 202-564-0130)

Questions	1-Bromopropane	Methylene Chloride	N-Methyl-2-pyrrolidone (NMP)	Perchloroethylene	Trichloroethylene
(1) Do you know of any reason that you might be unable to provide impartial advice on the matter to come before the panel/committee/subcommittee or any reason that your impartiality in the matter might be questioned?					
(2) Have you had any previous involvement with the review document(s) under consideration including authorship, collaboration with the authors, or previous peer review functions? If so, please identify and describe that involvement.					

(3) Have you served on previous advisory panels, committees or subcommittees that have addressed the topic under consideration? If so, please identify those activities.					
(4) Have you made any public statements (written or oral) on the issue that would indicate to an observer that you have taken a position on the issue under consideration? If so, please identify those statements.
